HARBORTOUCH ELITE® POS

A Best-in-Class POS Solution for Beer, Wine & Liquor Stores

The lowest cost of ownership for any POS system on the market

No up-front costs!*
Only $69/month!
Lifetime equipment warranty!**
PLUS 30 day trial period!

The Harbortouch Elite® POS system delivers a high quality point-of-sale solution that is unmatched in both reliability and functionality.

A custom solution for beer, wine and liquor stores, this software meets the unique needs of the spirits market. Efficiently manage your business so that you can focus on what's important: keeping your customers satisfied and spending!

BENEFIT FROM A WIDE RANGE OF USEFUL FEATURES

- **Inventory Tracking**: Import your existing inventory database in a snap. Once your inventory has been uploaded, the system will track your sales to monitor your stock levels and even create purchase orders automatically when stock runs low.

- **Employee Commissions**: Pay your employees commissions for selling particular products. Commissions can be awarded as a percentage of the sale price, percentage of the profit or a flat amount.

- **Employee Management**: Track your employees with a built-in time clock and view a detailed breakdown of hours worked for each employee or each day as well as their productivity. Security levels allow you to control the functions that particular employees are authorized to use.

- **Gift Receipts**: Gift receipts don't include prices so that customers can purchase gifts while enabling easy returns and exchanges.

- **Age Verification**: Age verification prompts the cashier to check the customer's identification and informs them if the customer can legally purchase age-restricted products.

- **Case/Multipack Support**: The system can differentiate between single drinks for individual sale and various sized cases or multipacks for accurate checkout and reporting.

- **Reports**: Obtain a top-level view of your business with robust reporting. A wide range of comprehensive reports allow you to monitor financials, track inventory, view sales history and identify sales trends.

- **Vendor Management**: Organize all your suppliers and other vendors in a single database to manage all of your important business relationships.

- **Flexible Pricing**: Dynamically customize your product pricing within seconds to accommodate coupons, sales, and other discounts.

- **Customer Database**: Keep a comprehensive record of customers' purchasing history and contact information to identify sales trends and best customers, ideal for loyalty and other incentive programs.

- **Purchase Order Creation**: You can create purchase orders directly through your POS system for easy inventory management and item reorders.
